

FOSFOLIP SYSTEM COMPLEX® JOINTS

Move free, be active, feel young

A unique formulation for maintaining a physiological function in muscles and joints. A mixture of **selected phospholipids** applied in complexing and activating the selected ingredients, in **a highly technological process**.

METHYL SULFONYL METHANE (MSM)

With its anti-inflammatory and free-radical scavenging properties, it has been well investigated and proven effective for joint health, with positive evidences in:

- ✓ Cartilage preservation
- ✓ Improved range of motion
- ✓ Reduced muscles soreness

GLUCOSAMINE-D-SULFATE (GDS)

Often recommended in combination with MSM, glucosamine sulfate has been regarded as one of the most interesting ingredient in food supplement dedicated to joint function.

Numerous clinical studies have proven its safety and efficacy

TODAY, MSM AND GDS CAN BE ABSORBED
SYNERGISTICALLY TOGETHER IN A NEW FOOD
SUPPLEMENT CONCEPT
