

## FOSFOLIP SYSTEM COMPLEX® BONES

Being strong every day, at any age

A unique formulation containing **vitamin D3 and K2** complexed together with **selected phospholipids**, realized through a **highly technological process**.

A SYNERGIC COMBINATION FOR A MAXIMIZED EFFECT.

- ✓ **VITAMIN D3 (Colecalciferol)**  
promotes intestinal uptake and transport of calcium, facilitating absorption into the bloodstream.
- ✓ **VITAMIN K2 (Menaquinone)**  
activates two K2-dependent proteins, osteocalcin and matrix Gla-protein (MGP), which work as calcium transporters.
- ✓ **Phospholipids** improve bioavailability for the two vitamins.

**K2** MGP BINDS EXCESS CALCIUM IN THE BLOOD AND PREVENTS ITS DEPOSITION IN ARTERIES.

**D3** OSTEOCALCIN INCORPORATES CALCIUM INTO BONE.

### **K2+D3 complex:**

Improved bone health and reduced risk of bone-related pain, at different stage in life.

DURING PREGNANCY, WHEN THE BODY'S DEMAND FOR CALCIUM IS VERY HIGH.

IN CHILDREN AND TEENS, WHOSE SKELETON GROWS FAST.

IN ELDERLY AGE, WHEN BONES AND ARTERIES PROBLEMS CAN BE CONCOMITANT.
